DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Claim(s) 38-59 are drawn to peptides of varying sequences and compositions comprising the peptides.

This application contains claims directed to more than one polypeptide (polypeptides of varying sequences). These polypeptides are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1, because under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons:

The claims are drawn to peptides having multiple amino acid substitutions (14 out of 28 positions have multiple substitutions; Claim 43 alone encompasses 196 different possible sequences). Thus, there is no apparent shared common core structure. Moreover, many of the substitutions affect different properties of the peptides. For example, substitutions at position 7 and 8 of the peptide affect resistance to degradation whereas other substitutions are not disclosed as having an affect on that particular property.

Art Unit: 1653

Therefore, in response to this Restriction Requirement, Applicant is required to elect a single polypeptide sequence. Claims 38-59 will then be examined to the extent that they read on the subject matter of the elected Group. Those claims that do not read on the elected subject matter will be considered non-elected and will be withdrawn from consideration. This requirement is not to be construed as a requirement for an election of species, since each of the compounds recited in alternative form is not a member of a single genus of invention, but constitutes an independent and patentably distinct invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
